A histogram showing the frequency distribution of word counts for the 'text' variable. The x-axis is labeled 'Word Count' and ranges from 0 to 600. The y-axis is labeled 'Frequency' and ranges from 0 to 1400. The distribution is highly right-skewed, with a peak frequency of approximately 1380 for word counts between 0 and 25. The frequency drops sharply as word count increases, with most of the data concentrated below 100 words.
